IV. SUMMARY OF PRINCIPAL ACCOUNTING POLICIES

The principal accounting policies applied by the Company in the preparation of the Financial Statements are as follows:

NOTES TO THE FINANCIAL STATEMENTS (CONT.)

These Notes form an integral part of and should be read in conjunction with the Financial Statements

IV. SUMMARY OF PRINCIPAL ACCOUNTING POLICIES (CONT.)**• Accounting estimate**

The preparation of the Financial Statements in conformity with the Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System and relevant statutory requirements on the preparation and presentation of Financial Statements requires the Board of Management to make estimates and assumptions that affect the reported amounts of liabilities, assets and the presentation of contingent liabilities and assets at the date of the Financial Statements as well as the reported amounts of revenue and expenses during the fiscal year. Although the accounting estimates are made to the best of the Board of Management's knowledge, the actual amounts incurred may differ from the estimates and assumptions made.

• Cash and cash equivalents

Cash and cash equivalents include cash on hand, demand deposits, short-term investments of which the due dates do not exceed 3 months that are readily convertible into known amounts of cash and that are subject to an insignificant risk of change in value.

• Receivables

Receivables are the amounts that can be recovered from customers or other entities. Receivables are recognized at the carrying amounts less allowances for doubtful debts.

Allowance for doubtful debts is made for overdue receivables stated in economic contracts, loan agreements, contractual commitments or debt commitments and receivables that have not yet been overdue but unlikely to be recovered. In particular, allowance is made for outstanding debts based on the principal repayment period according to the original sales contract, not taking into account debt extension between the parties and for receivables that have not yet overdue but the debtor has gone bankrupt or has been in the process of dissolution, missing or absconding.

• Inventories

Inventories are recognized at the lower of cost and net realizable value. Costs of inventories comprise costs of direct materials, labor and attributable general manufacturing expenses, if any, incurred in bringing the inventories to their present location and conditions. The cost of inventories is assigned by using the weighted average cost formula. Net realizable value is the estimated selling prices less the estimated expenses on product completion and other necessary expenses for marketing, sale and distribution.

Allowance for devaluation of inventories is made in accordance with the prevailing accounting regulations. Accordingly, the Company is allowed to make allowance for inventories when their costs are higher than their net realizable value as of the balance sheet date.

• Prepaid expenses

- Prepaid expenses comprise actual expenses arising and relevant to financial performance in several accounting periods. Prepaid expenses include expenses for fixed asset repairs, prepaid land rental, insurance premiums and other prepaid expenses.

- Prepaid land rental reflects the rental already prepaid and is allocated into Income Statement in accordance with the straight-line method over the lease term.

- Other prepaid expenses include expenses for tools, small components and are allocated into the Income Statement in accordance with the straight-line method as stipulated in the prevailing accounting regulations.

• Tangible fixed assets and depreciation

Tangible fixed assets are determined by their historical costs less accumulated depreciation.

Historical costs of tangible fixed assets include cost of purchase and all the directly attributable expenses to bring the asset to its working condition for its intended use.

Historical costs of self-made or self-constructed tangible fixed assets include construction costs, actual production costs and installation and testing costs.

NOTES TO THE FINANCIAL STATEMENTS (CONT.)

These Notes form an integral part of and should be read in conjunction with the Financial Statements

IV. SUMMARY OF PRINCIPAL ACCOUNTING POLICIES (CONT.)

Tangible fixed assets are depreciated in accordance with the straight-line method over their estimated useful lives. The depreciation years applied are as follows:

	<u>Years</u>
Buildings and structures	03 - 15
Machinery and equipment	03 - 06
Vehicles	03 - 06
Office equipment	03 - 05
Other fixed assets	02

• Recognition of revenue

Revenue from sales of merchandises shall be recognized when all of the following five (5) conditions are satisfied:

- (a) The Company has transferred most of risks and benefits incident to the ownership of products or merchandises to customers;
- (b) The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the merchandises sold;
- (c) The amount of revenue can be measured reliably. When the contract stipulates that the buyer has right to return merchandises, products purchased under specific conditions, revenue is recognized only when those specific conditions no longer exist and the buyer retains no right to return merchandises, products (except for the case that such returns are in exchange for other merchandises or services);
- (d) It is probable that the economic benefits associated with sale transactions will flow to the Company;
- (e) The cost incurred or to be incurred in respect of the sale transaction can be measured reliably.

Revenue from rendering of services is recognized when the outcome of that transaction can be measured reliably. In the case that the services are rendered in several accounting periods, revenue is recognized on the basis of the stage of completion as of the balance sheet date. The outcome of rendering of services shall be recognized when all of the following four (4) conditions are satisfied:

- (a) The amount of revenue can be measured reliably. When the contract stipulates that the buyer is entitled to return the services rendered under specific conditions, revenue is recognized only when those specific conditions no longer exist and the buyer is not entitled to return the services rendered;
- (b) The Company received or shall probably receive the economic benefits associated with the rendering of services;
- (c) The stage of completion of the transaction at the end of reporting period can be measured reliably; and
- (d) The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

• Borrowings costs

Borrowing costs are recorded into operating expenses when incurred, unless capitalized in accordance with the provisions of the Accounting Standard "Borrowing costs". Accordingly, the borrowing costs that are directly attributable to the purchase, construction or the production of an asset and takes a substantial period of time to get ready for intended use or sale of the asset will be included in the cost of that asset until that asset is put into use or sale. Income arisen from provisional investments as loans is recognized as a decrease in the costs of relevant assets. To the extent that the borrowings are especially for the purpose of construction of fixed assets and investment property, borrowing costs are eligible for capitalization even if construction period is under 12 months.

• Foreign currency transactions

Transactions in foreign currencies are converted at the actual exchange rates ruling as of the transaction dates. The ending balances of monetary items in foreign currencies are converted at the actual exchange rates ruling as of the balance sheet date.

Foreign exchange differences arisen from foreign currency transactions during the year shall be included into financial income or financial expenses. Foreign exchange differences due to the revaluation of ending balances of the monetary items in foreign currencies after offsetting their positive differences against negative differences shall be included into financial income or financial expenses.

NOTES TO THE FINANCIAL STATEMENTS (CONT.)

These Notes form an integral part of and should be read in conjunction with the Financial Statements

IV. SUMMARY OF PRINCIPAL ACCOUNTING POLICIES (CONT.)

The exchange rate used to convert foreign currency transactions is the actual exchange rate ruling as of the time of these transactions. The actual exchange rates applied to foreign currency transactions are as follows:

- For the foreign currency trading contract (including spot contract, forward contract, future contract, option contract, currency swap): the exchange rate stipulated in the contracts of trading foreign currency between the Company and the Bank.
- If the contract does not specify the applied exchange rate:
 - For capital contribution made or received: the buying rate of the bank where the Company opens its account to receive capital contributed from investors as of the date of capital contribution.
 - For receivables: the buying rate ruling as of the time of transaction of the commercial bank where the Company designates the customers to make payments.
 - For payables: the selling rate ruling as of the time of transaction of the commercial bank where the Company supposes to make payments.
 - For acquisition of assets or immediate payments in foreign currency (not included into payable accounts): the buying rate of the commercial bank where the Company makes payments.

The exchange rate used to revalue ending balances of monetary items in foreign currencies as of the balance sheet date is determined as follows:

- For foreign currency deposits: the buying rate of the bank where the Company opens its foreign currency account.
- For monetary items in foreign currencies classified as other assets: the buying rate of the Bank where the Company frequently conducts transactions.
- For monetary items in foreign currencies classified as payables: the selling rate of the Bank where the Company frequently conducts transactions.

• Tax

Corporate income tax represents the sum of current and deferred tax liabilities.

Current income tax is the tax amount computed based on the taxable income during the year. Taxable income is different from accounting profit presented in the Income Statement because taxable income excludes income or expenses that are taxable or deductible in other years (including losses carried forward, if any) and excludes non-taxable or non-deductible items.

Deferred income tax is the amount of corporate income tax payable or refundable due to temporary differences between book values of assets and liabilities serving the preparation of the financial statements and the values for tax purposes. Deferred income tax liabilities are recognized for all the temporary taxable differences. Deferred income tax assets are recorded only when there is an assurance on the availability of taxable income in the future against which the temporarily deductible differences can be used.

Deferred income tax is determined at the estimated rate to be applied in the year when the assets are recovered or the liabilities are settled. Deferred income tax is recognized in the Income Statement and shall be included in the owner's equity only in the case that it is related to the items that are recognized directly in the owner's equity.

The Company shall offset deferred tax assets and deferred tax liabilities when the Company has the legal right to offset current income tax assets against current income tax liabilities and when deferred income tax assets and deferred income tax liabilities are relevant to corporate income tax which is under the management of one tax authority and the Company has intention to pay current income tax on a net basis.

The determination of the Company's corporate income tax liability is based on the prevailing regulations on taxes. However, these regulations may change from time to time and the final determination of corporate income tax amount will depend on the inspection result of the Tax Office.

Other taxes are applied according to the prevailing regulations on taxes in Vietnam.

NOTES TO THE FINANCIAL STATEMENTS (CONT.)

These Notes form an integral part of and should be read in conjunction with the Financial Statements

V. SUMMARY OF PRINCIPAL ACCOUNTING POLICIES (CONT.)**• Earnings per share**

Basic earnings per share is calculated by dividing profit/ (loss) after tax distributed to the Company's ordinary equity holders (after deducting the appropriated amount for bonus and welfare funds) by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings per share is calculated by dividing profit/ (loss) after tax distributed to the Company's ordinary equity holders (after adjusting for dividends on convertible preferred shares) by the weighted average number of ordinary shares outstanding during the year and the weighted average number of ordinary shares to be issued in the event that all the dilutive potential ordinary shares are converted into ordinary shares.

• Related parties

Parties considered to be related parties are enterprises including parent company, subsidiaries, associates and individuals, that directly or indirectly through one or more intermediaries, are able to control the Company, or are controlled by the Company, or are under the common control with the Company. Associates, individuals that directly or indirectly hold the voting right in the Company and have significant influence over the Company; key managers including directors and officers of the Company; close family members of these individuals or associates and associates with these individuals are also considered to be related parties.

In considering each possible related party relationship, attention is directed to the substance of the relationship and not merely the legal form.
